ARP Case Report nº 18: What is your diagnosis?

Caso Clínico ARP nº 18: Qual o seu diagnóstico?

David Campos Correia, Miguel Franco Gago, Tiago Saldanha, Carla Saraiva

Case Presentation

72-year-old male, referred to our hospital due to 5-month history of dry cough, increasing abdominal discomfort and feeling of abdominal fullness. Laboratory results revealed anaemia, mild leucocitosis and elevated C-reactive protein levels. Ultrasound was initially performed, followed by Computed Tomography.

Send your answer containing the diagnosis (s) to the email address actarp.on@gmail.com. The names of the authors of the correct answers will be published in the next issue of the ARP in the case solution.
