

NOTAS E RECENSÕES

NOTA BIBLIOGRÁFICA

A LOCALIZAÇÃO DAS ACTIVIDADES TERCIÁRIAS NO INTERIOR DAS ÁREAS URBANAS

Os problemas criados pelo rápido crescimento das cidades levam à procura de soluções e modelos de planeamento que permitam a organização racional das cidades. O interesse suscitado nos últimos anos por estes assuntos tem incrementado os estudos em Geografia Urbana, que, pela necessidade de responder a questões específicas, raramente constituem obras de conjunto.

A bibliografia que a seguir indicamos não pretende ser exaustiva. Refere-se às obras que pela sua importância poderão ser consideradas básicas na orientação de trabalhos relativos à localização das actividades terciárias no interior dos centros urbanos. O maior número de trabalhos dedicados à actividade comercial justifica o desequilíbrio entre as obras citadas relativas a este sector e o restante equipamento urbano.

A utilização dos vários tipos de equipamento depende das características culturais das populações utentes. Daí ter havido a preocupação de reunir obras referentes a cidades localizadas nos mais variados pontos do globo, sendo assim possível conhecer tecidos urbanos de formas e características várias e apreender as experiências oferecidas pelas intervenções urbanísticas adequadas.
