KEYWORDS: Anterior Chamber; Cysts; Iris Diseases.

PALAVRAS-CHAVE: Câmara Anterior; Doenças da Íris; Quistos.

An 18-year-old boy presented to our emergency department with a 1-month history of a painful left eye, photophobia, and progressive blurring of vision. His past ocular history included a penetrating left globe injury, surgically repaired 1 year before. Biomicroscopy revealed a scar in the inferior cornea and a huge epithelial iris cyst, reaching the visual axis (Fig. 1A). BCVA of the left eye was 20/320, and intraocular pressure was 20 mmHg. Further investigation, namely ultrasound biomicroscopy (Fig. 1B), and anterior segment-optical coherence tomography (OCT) (not shown) supported this diagnosis. Nd:YAG laser cystotomy was performed to rupture the cyst wall and drain its fluid content. Immediate shrinkage of the cyst was seen, but additional follow-up is required to rule out the development of procedure-related complications and cyst recurrence.

With the evolution of surgical techniques, posttraumatic iris cysts have become rare entities.^{1,3} Nevertheless, its recognition and management are mandatory for any ophthalmologist.

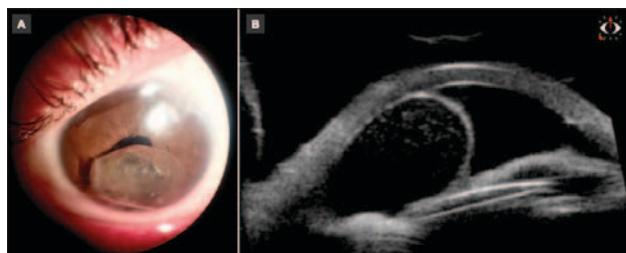

Figure 1. Falta legenda.

PRESENTATIONS AND AWARDS

This clinical picture was included in a poster presentation in 10th EUCORNEA Congress, Paris, 2019; and in the 61st edition of Congresso Português de Oftalmologia, Vilamoura, 2018.

CONTRIBUTORSHIP STATEMENT / DECLARAÇÃO DE CONTRIBUIÇÃO:

MLD: redação da versão final do manuscrito.

MLD, VF e PFC: contribuição para a redação das versões anteriores do manuscrito; revisão e aprovação do manuscrito final.

RESPONSABILIDADES ÉTICAS

Conflitos de Interesse: Os autores declaram a inexistência de conflitos de interesse na realização do presente trabalho.

Fontes de Financiamento: Não existiram fontes externas de financiamento para a realização deste artigo.

Confidencialidade dos Dados: Os autores declaram ter seguido os protocolos da sua instituição acerca da publicação dos dados de doentes.

Consentimento: Consentimento do doente para publicação obtido.

Proveniência e Revisão por Pares: Não comissionado; revisão externa por pares.

ETHICAL DISCLOSURES

Conflicts of Interest: The authors have no conflicts of interest to declare.

Financing Support: This work has not received any contribution, grant or scholarship.

Confidentiality of Data: The authors declare that they have followed the protocols of their work center on the publication of data from patients.

Patient Consent: Consent for publication was obtained.

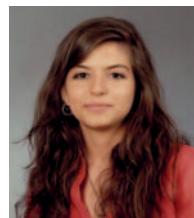

Provenance and Peer Review: Not commissioned; externally peer reviewed.
